Energy Tracking & Benchmarking

Energy Benchmarking measures and compares your building's energy performance against similar properties or industry standards

BCNPHA Helps You Turn Energy Data into Action

We'll set you up with an ENERGY STAR® Portfolio Manager® (ESPM) account to provide automated consumption data for your BC Hydro and FortisBC accounts, and:

- Maintain data integrity in ESPM by monitoring and resolving issues in meter entries
- Share monthly notifications on any identified meter consumption anomalies
- Issue post-retrofit measurement and verification (M&V) briefs
- Deliver comprehensive portfolio-level energy and emissions interactive dashboards
- Ensure compliance with energy and carbon reporting bylaws in BC
- Respond to energy data requests from consultants and contractors

Benefits of Energy Benchmarking

- Direct resources toward the most effective improvements to maximize retrofit impact
- Assess the financial and performance benefits of your energy upgrades
- Support your long-term environmental strategy by measuring and managing GHG emissions
- Detect energy use anomalies through regular consumption monitoring

You can't improve what you don't measure!

Our Benchmarking service is FREE for all non-profit housing providers. Contact us to:

- Schedule a personalized demo of ENERGY STAR® Portfolio Manager® and our interactive dashboards
- Learn about the simple steps to begin benchmarking your buildings
- Ask us any questions about our service or how we can support your energy and carbon reporting goals
