

Contact BCNPHA to Start Exploring Energy Conservation Measures

Regardless of which assessment is best for your society, our Asset Management team will identify energy conservation measures that can help reduce energy costs, improve tenant comfort, and decrease emissions where possible.

No-Cost Assessments

BCNPHA no-cost Level 1 energy audits help organizations better understand how their buildings consume energy and provides important details about their energy systems. Based on the findings, recommended energy conservation measures will be identified, along with applicable funding opportunities for each measure. All building types are eligible for Level 1 energy audits.

BC Hydro Opportunity Assessments

BCNPHA also offers **BC Hydro's Opportunity Assessment** (OA), as part of their **Social Housing Energy Savings** Program (SH-ESP). The OA provides an enhanced analysis of the site's energy use, business cases for recommended energy conserving measures, and directly connects recommended measures to applicable SH-ESP's equipment upgrade incentives. OAs are available for SH-ESP eligible buildings as outlined on the SH-ESP website. Funding is available to cover 100% of the costs of the assessment (except GST).

Contact BCNPHA to Receive Free Energy Efficiency Retrofit Coaching

Our asset management department will help you find the right balance between building performance, risk reduction and cost optimization. BCNPHA offers free energy efficiency coaching for all non-profit housing providers.
